

## StaySafe Lone Worker

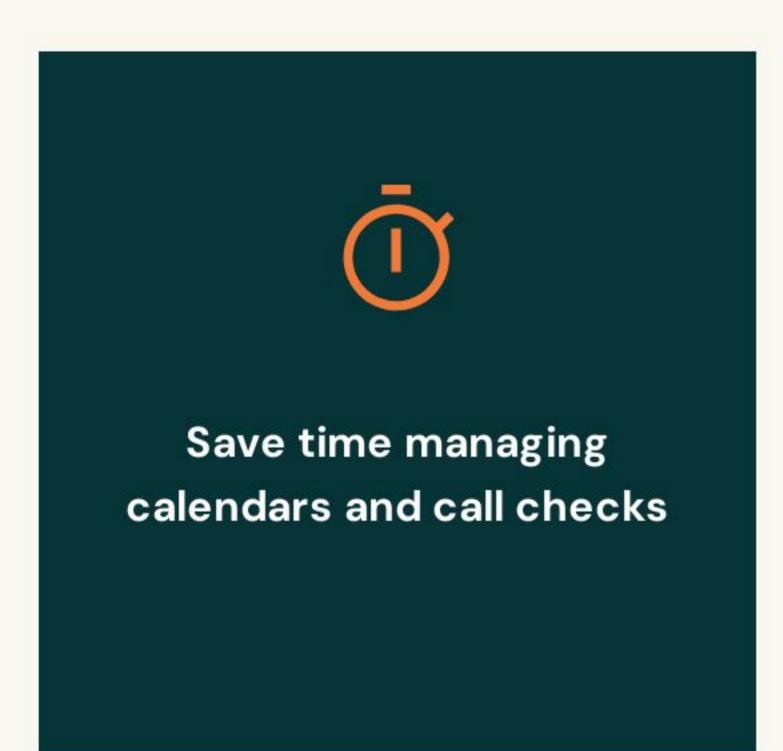

Protect your lone workers 24/7, wherever they are.

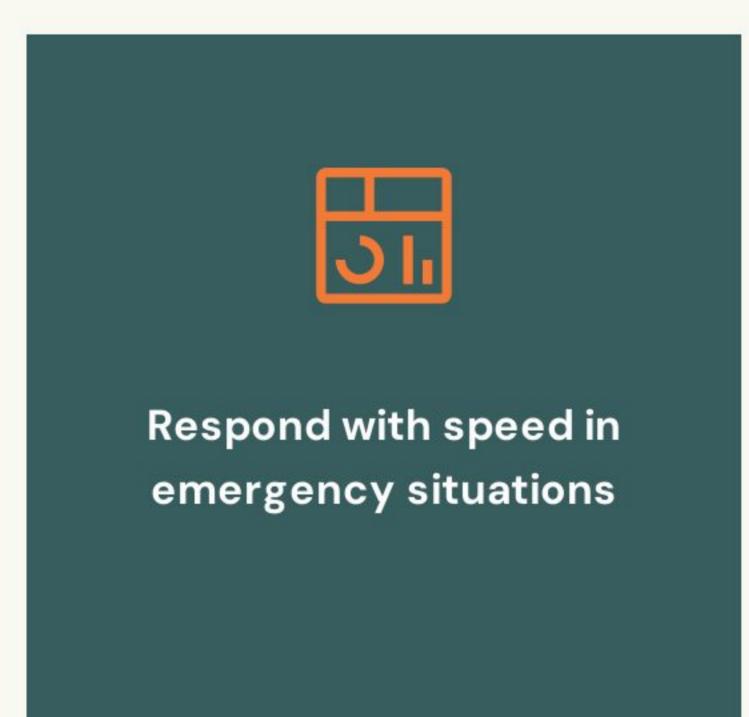

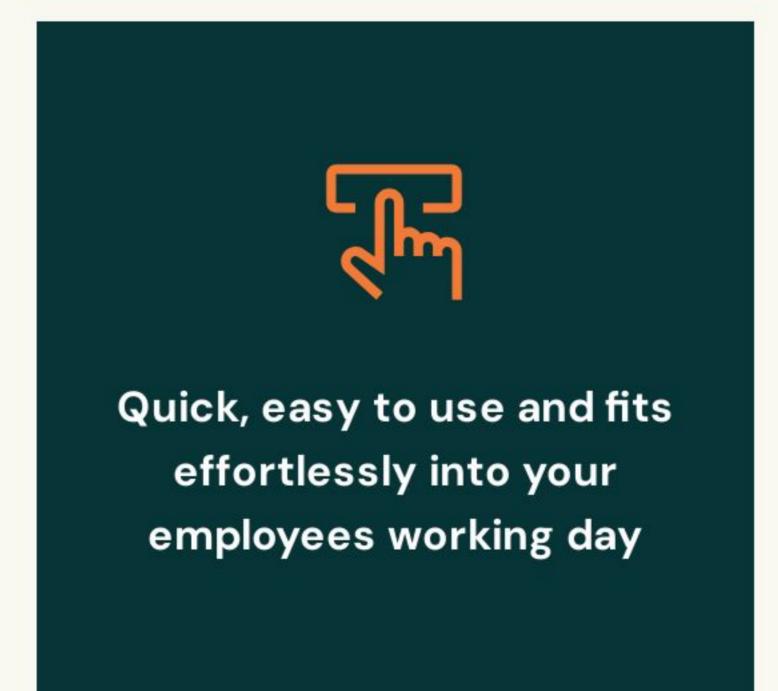

Quickly and easily locate employees in an emergency and send immediate help with our lone worker app and solutions.

Our easy-to-use lone worker app enables your employees to check-in safely and request immediate assistance in an emergency. The monitoring hub gives employers full location visibility and alert response management.

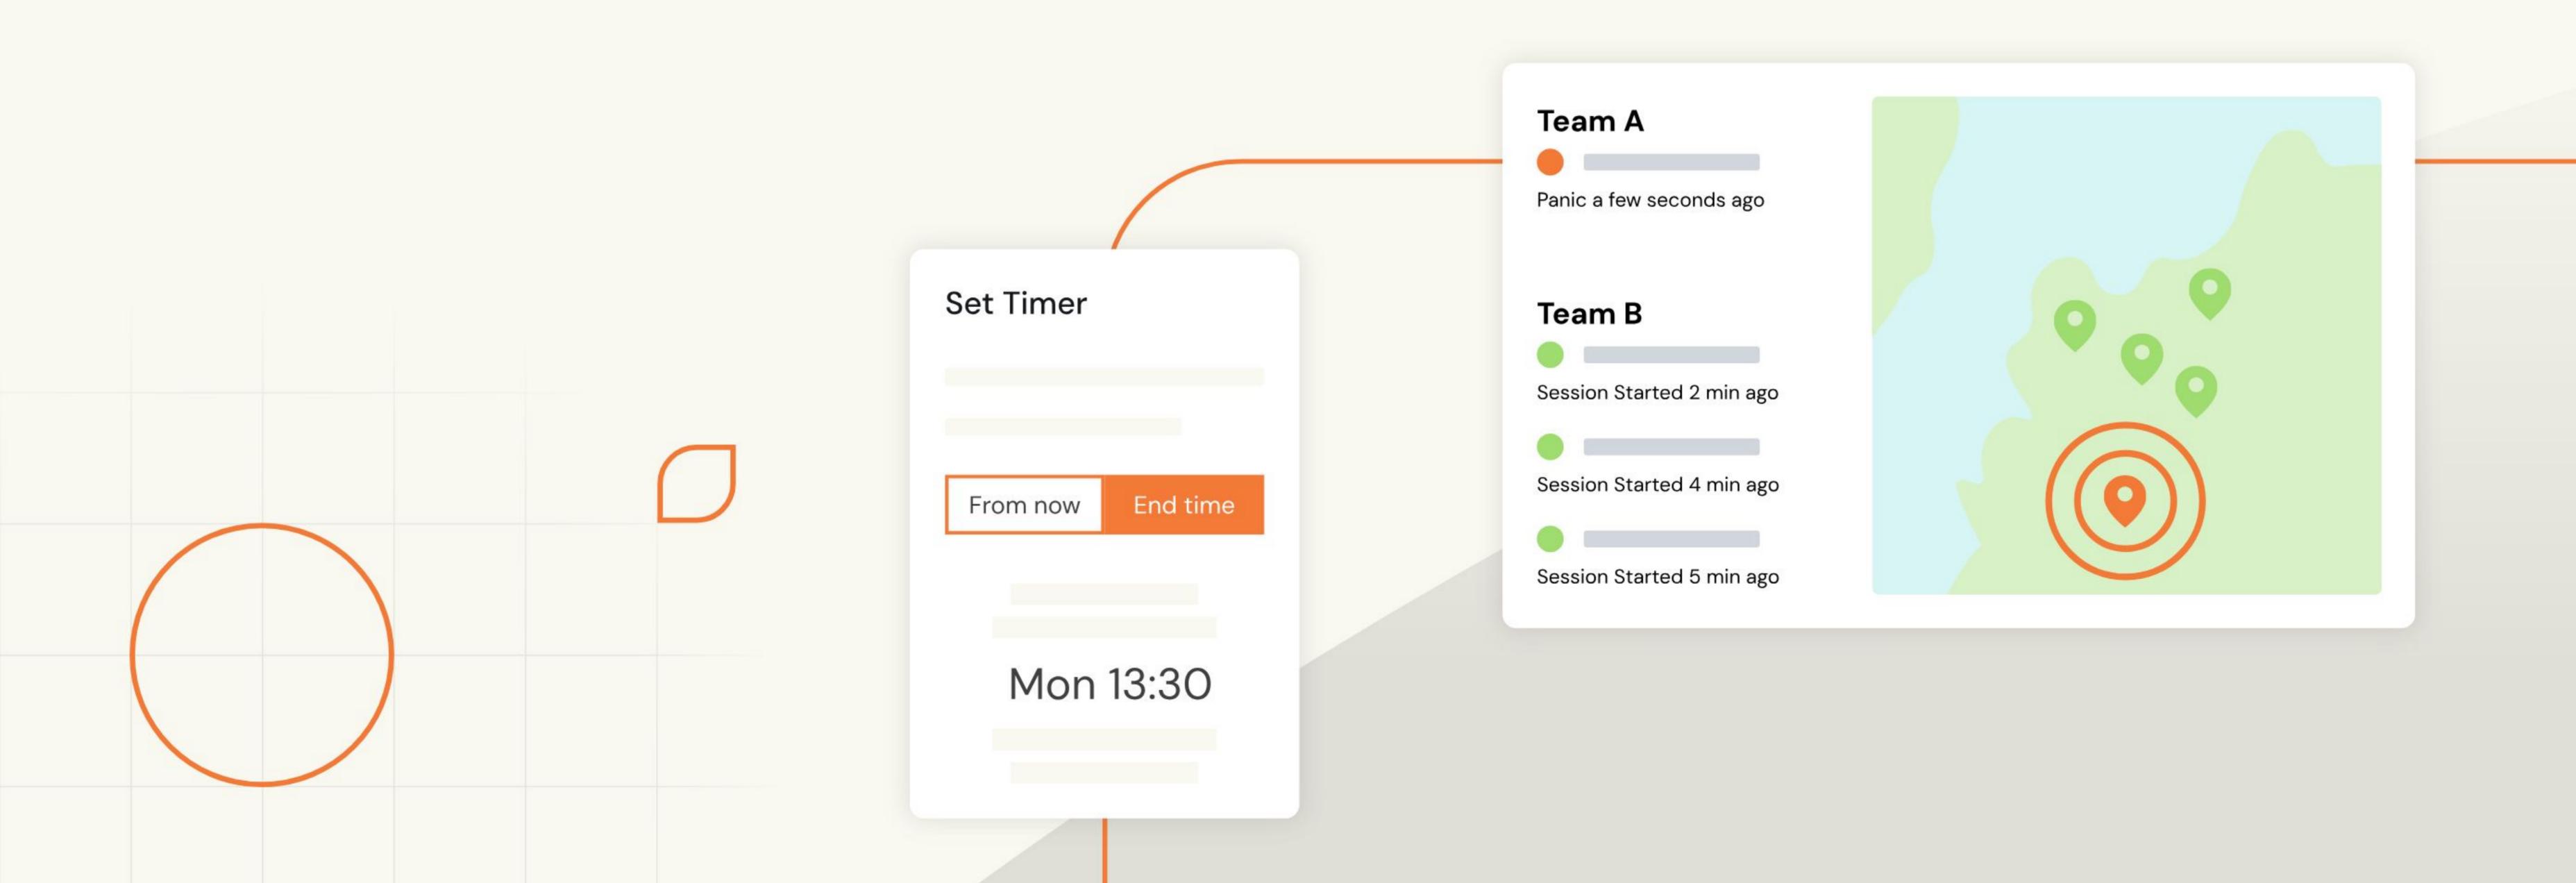

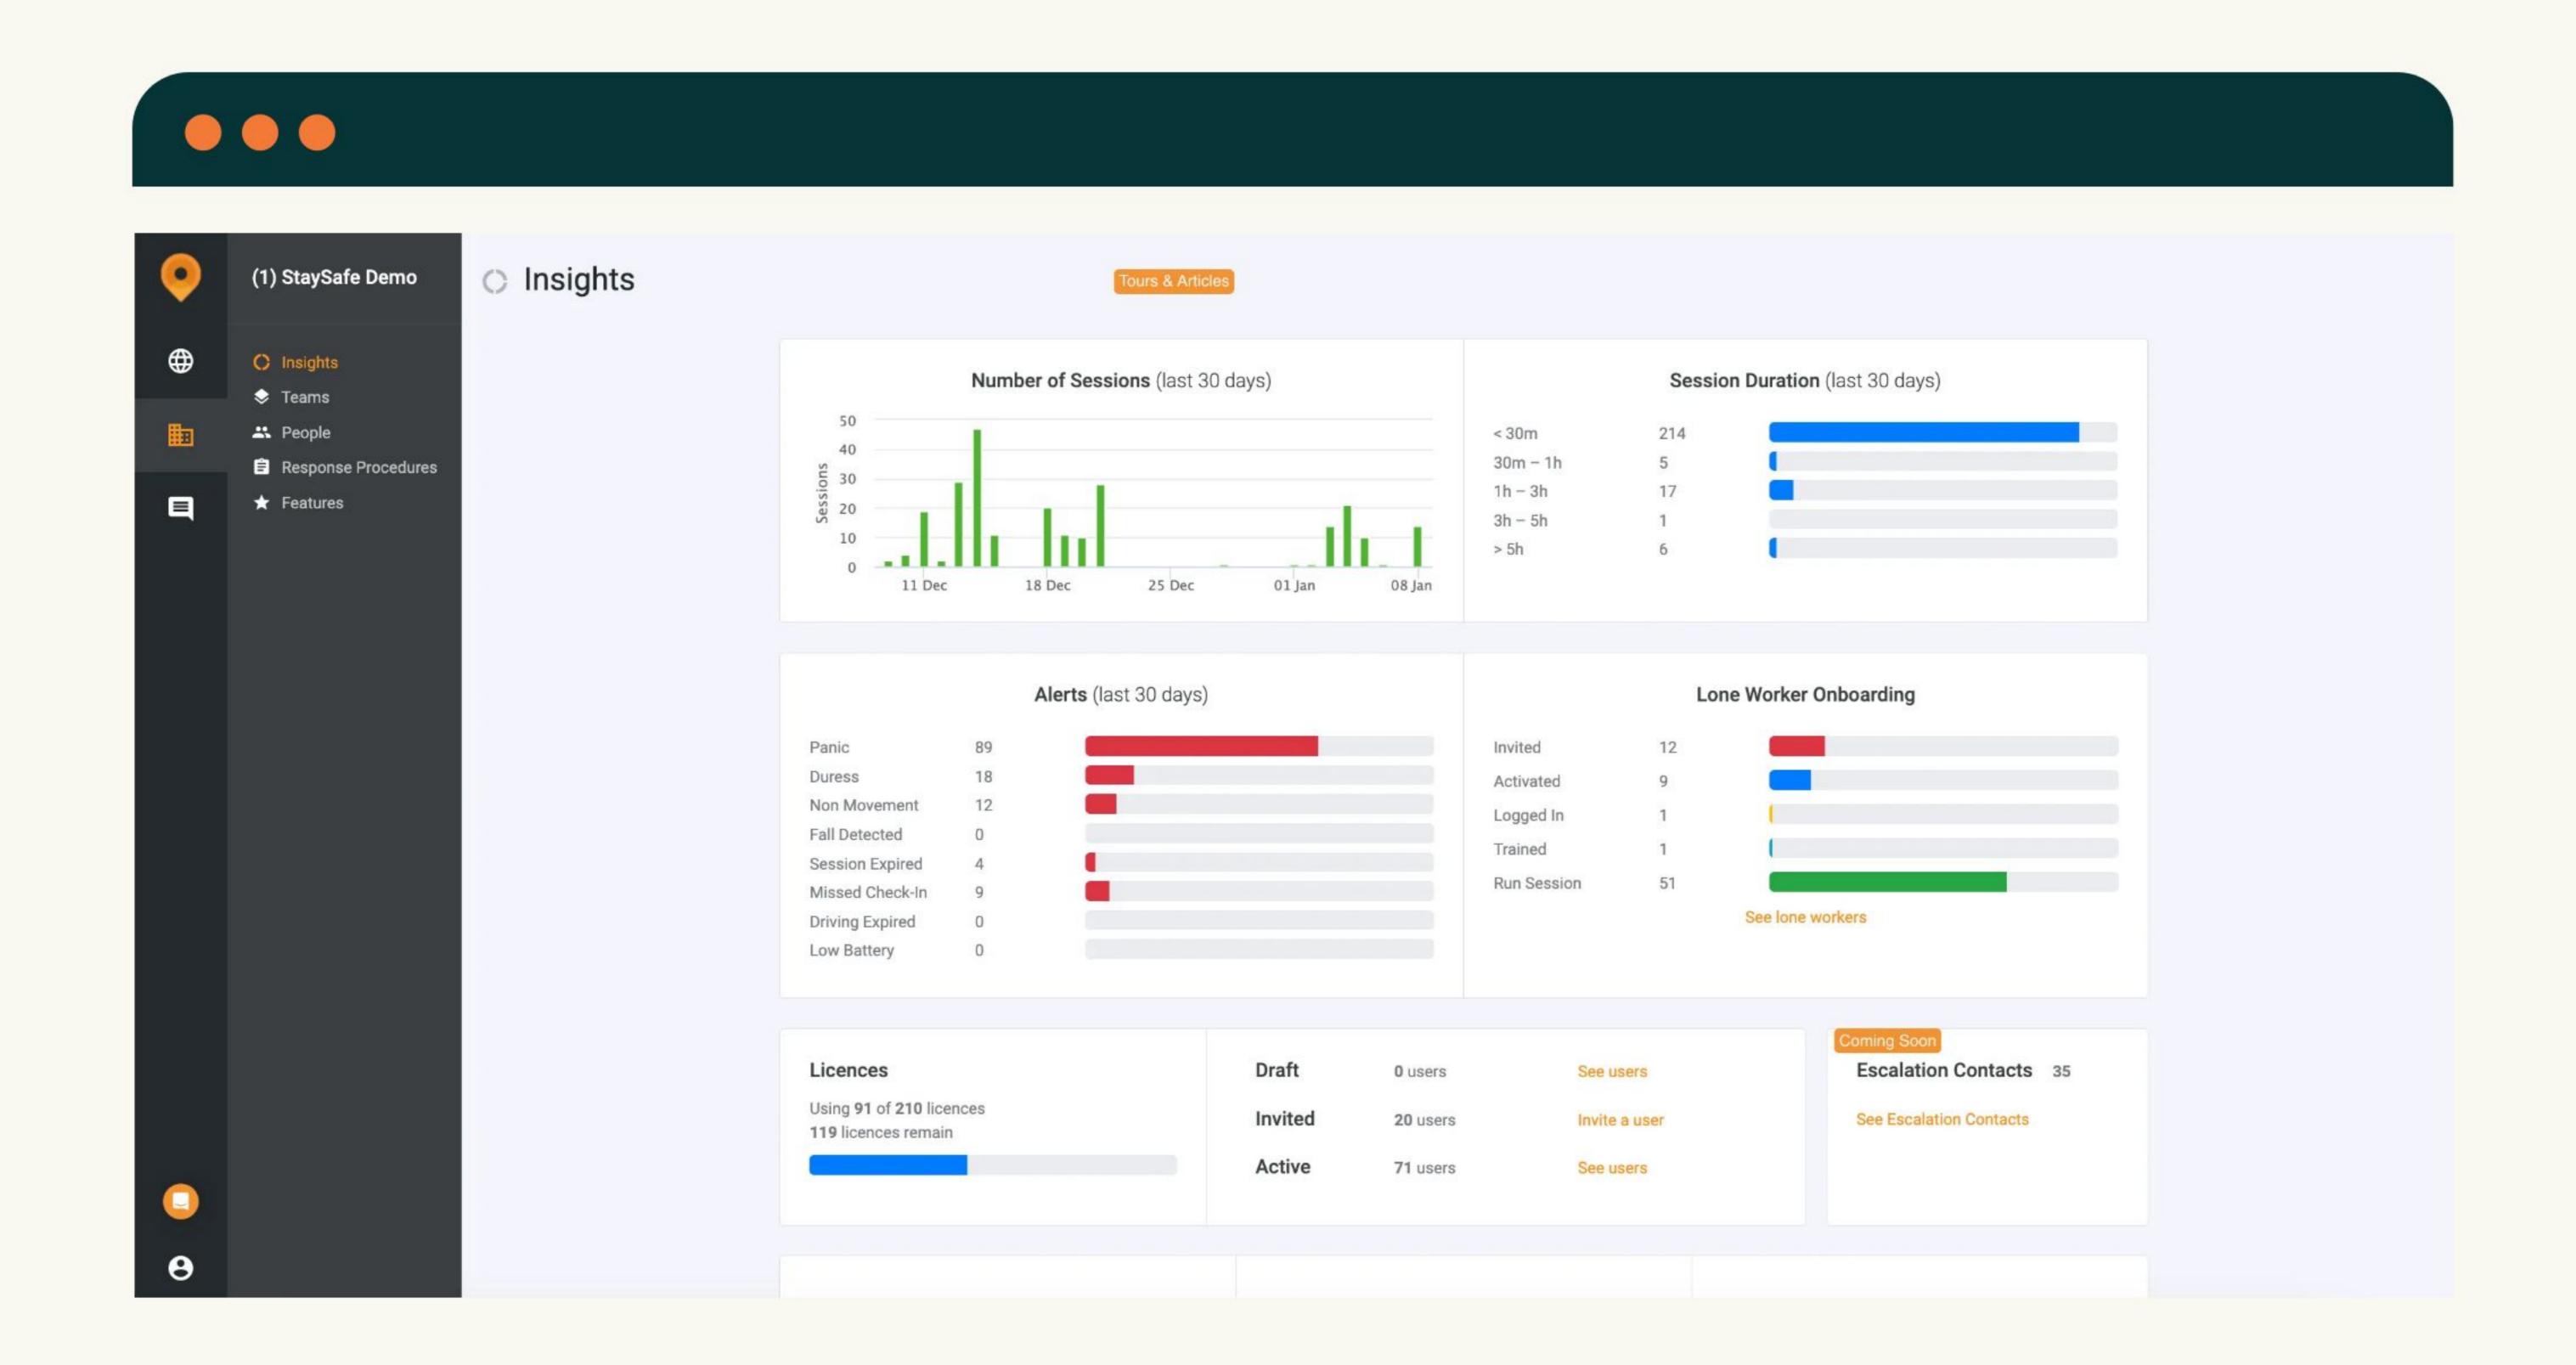

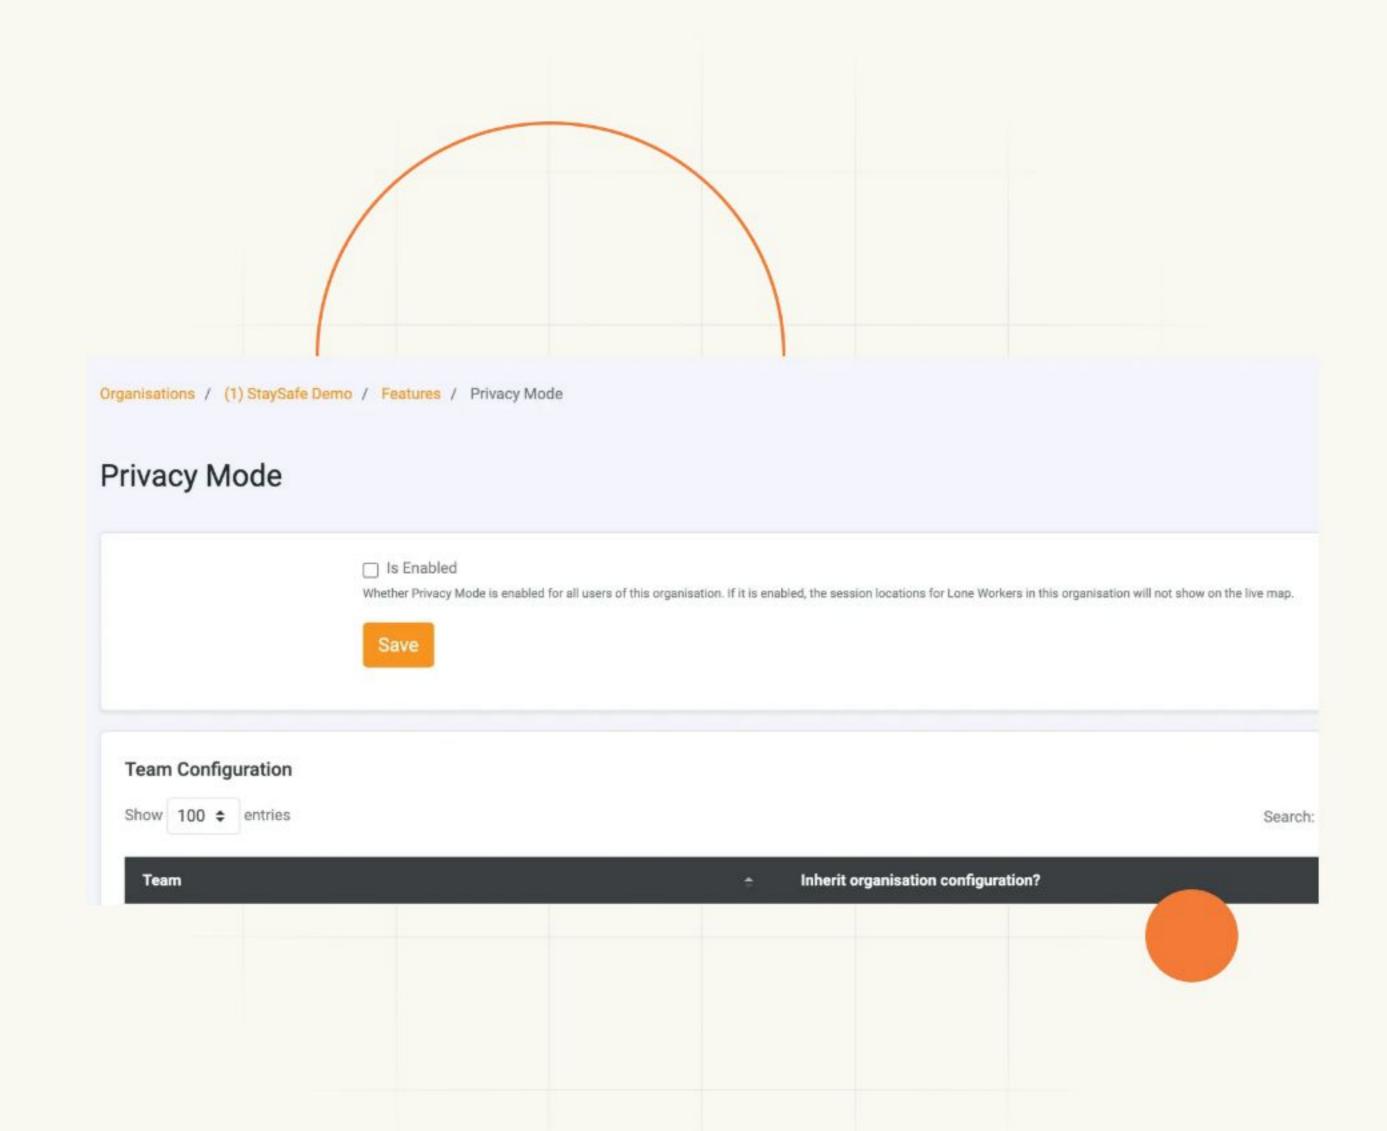

## Always on safety

With an easy-to-use app you can ensure the safety of your workforce around the clock and quickly respond to emergencies.

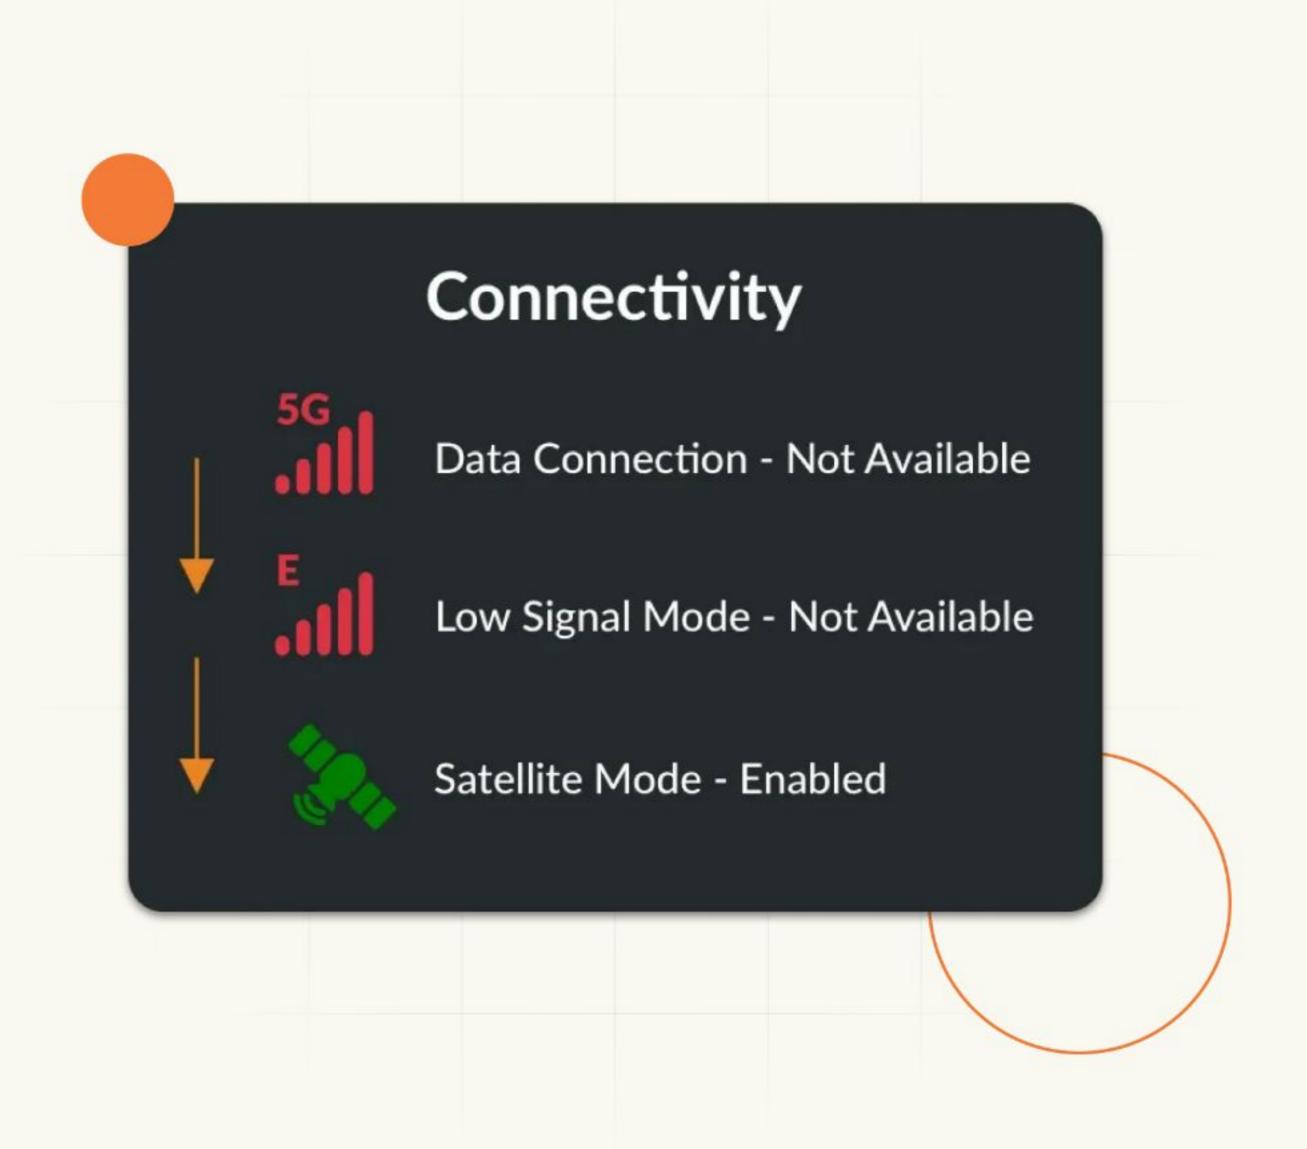

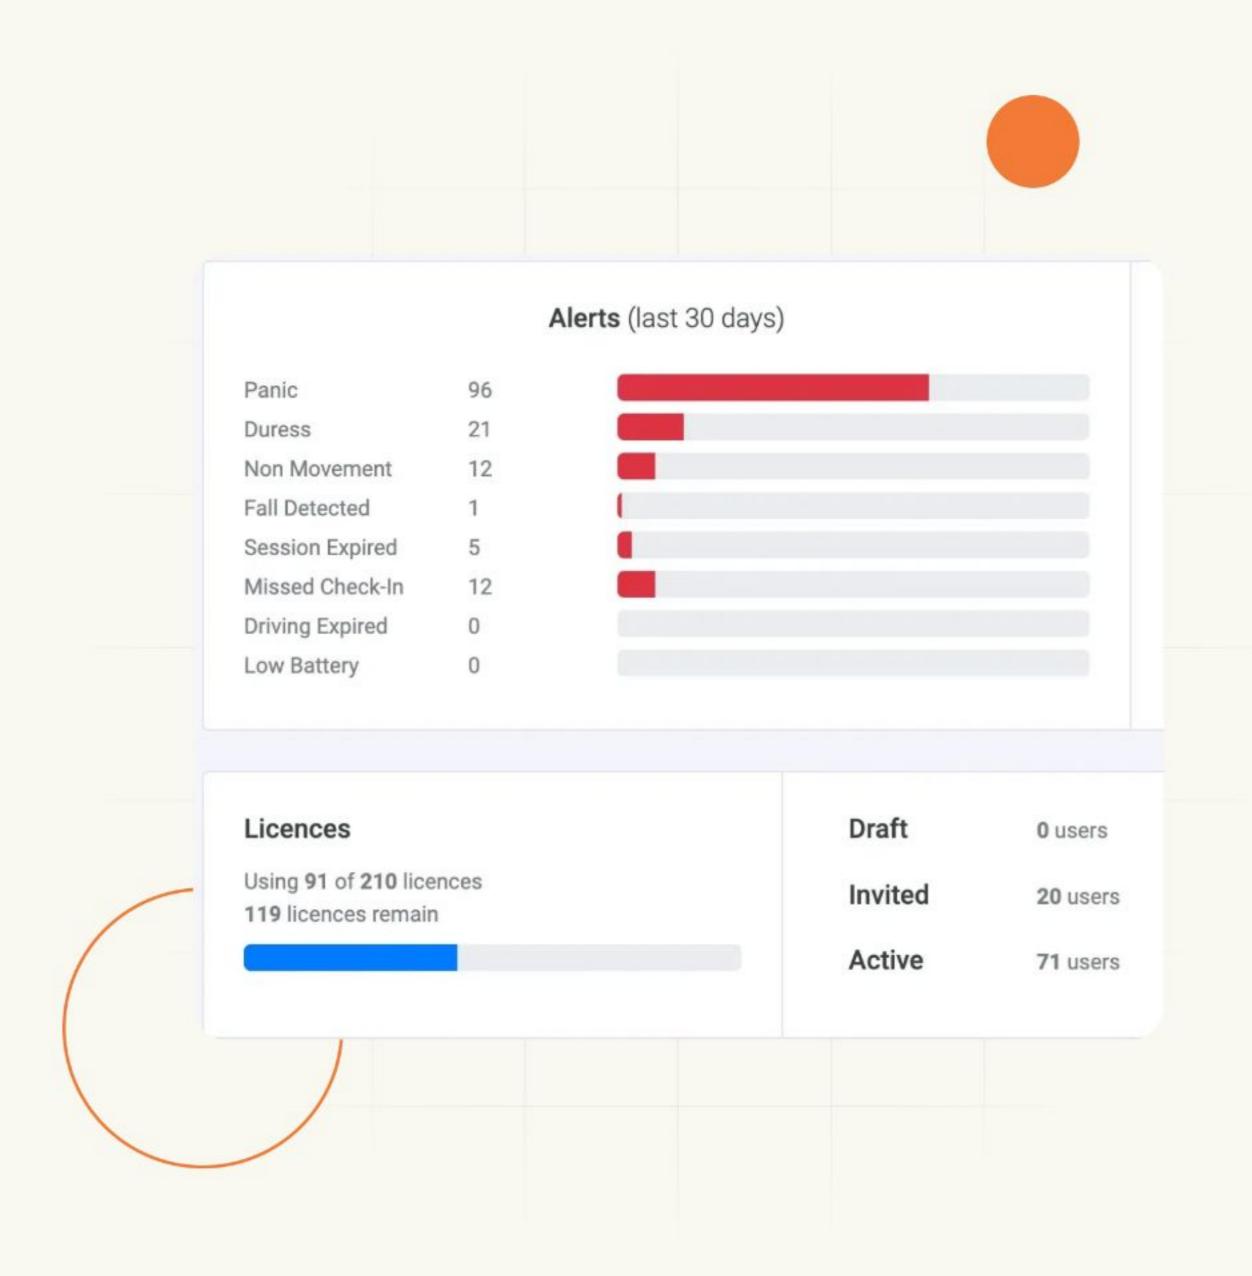

#### Place workers in control

Give workers control over their safety. Have workers maintain their personal privacy for when their location is visible, ensuring privacy is maintained increasing participation.

## Keep workers safe, anywhere in the world

Seamlessly switch between available connections when working in areas of low and no signal. When a lone worker's mobile device is connected to a cell tower but data (3G/4G/5G) is unavailable, the app will use low signal mode to send welfare check-ins and panic alarms. Satellite mode provides peace of mind for you and your workers in even the most remote working environments by connecting a mobile device to a Satellite device and retaining full app functionality.

## Enhance your safety program

A cost-effective solution that fits effortlessly into a worker's daily routine to get the maximum return on investment.

### Lone Worker App

The StaySafe app gives employers visibility of the location and safety status of lone workers in an emergency and allows them to check-in safely once they have finished a lone working or travel session. Employees are in complete control of when their location is visible to ensure their privacy is maintained.

Key features include:

#### Panic alerts

Raise an immediate alert if employees are in need of assistance. A panic can be raised at any time the app doesn't need to be active.

#### Timed sessions

Ensures your employees have finished working safely and/or are home safe.

#### Fall detection

Automatically sends an alert to the hub when an employee suffers an impact.

## Secure cloud-based monitoring Hub

Our lone worker app is linked to a secure cloud-based monitoring Hub that provides you with real-time updates on the safety status of your lone workers. In an emergency, you can accurately locate your lone workers on a map and send immediate assistance to them.

Key features include:

#### Disaster communications

Use the SMS broadcast feature to communicate with your team quickly and easily by sending group SMS messages to all or selected users via the hub.

#### Two-way audio

If an employee raises a panic alarm, two-way audio allows the responder to listen in on the situation and talk to the lone worker via the app where appropriate.

#### What3words

The StaySafe hub is integrated with what3words for additional location accuracy

### Satellite tracking

Locate and protect your employees anywhere in the world, beyond the limits of standard mobile networks.

Easy-to-use, cost-effective satellite tracking solution for remote workers. 100% global connectivity using the iridium network. Simply pair your phone to a compatible Garmin satellite device

Key features include:

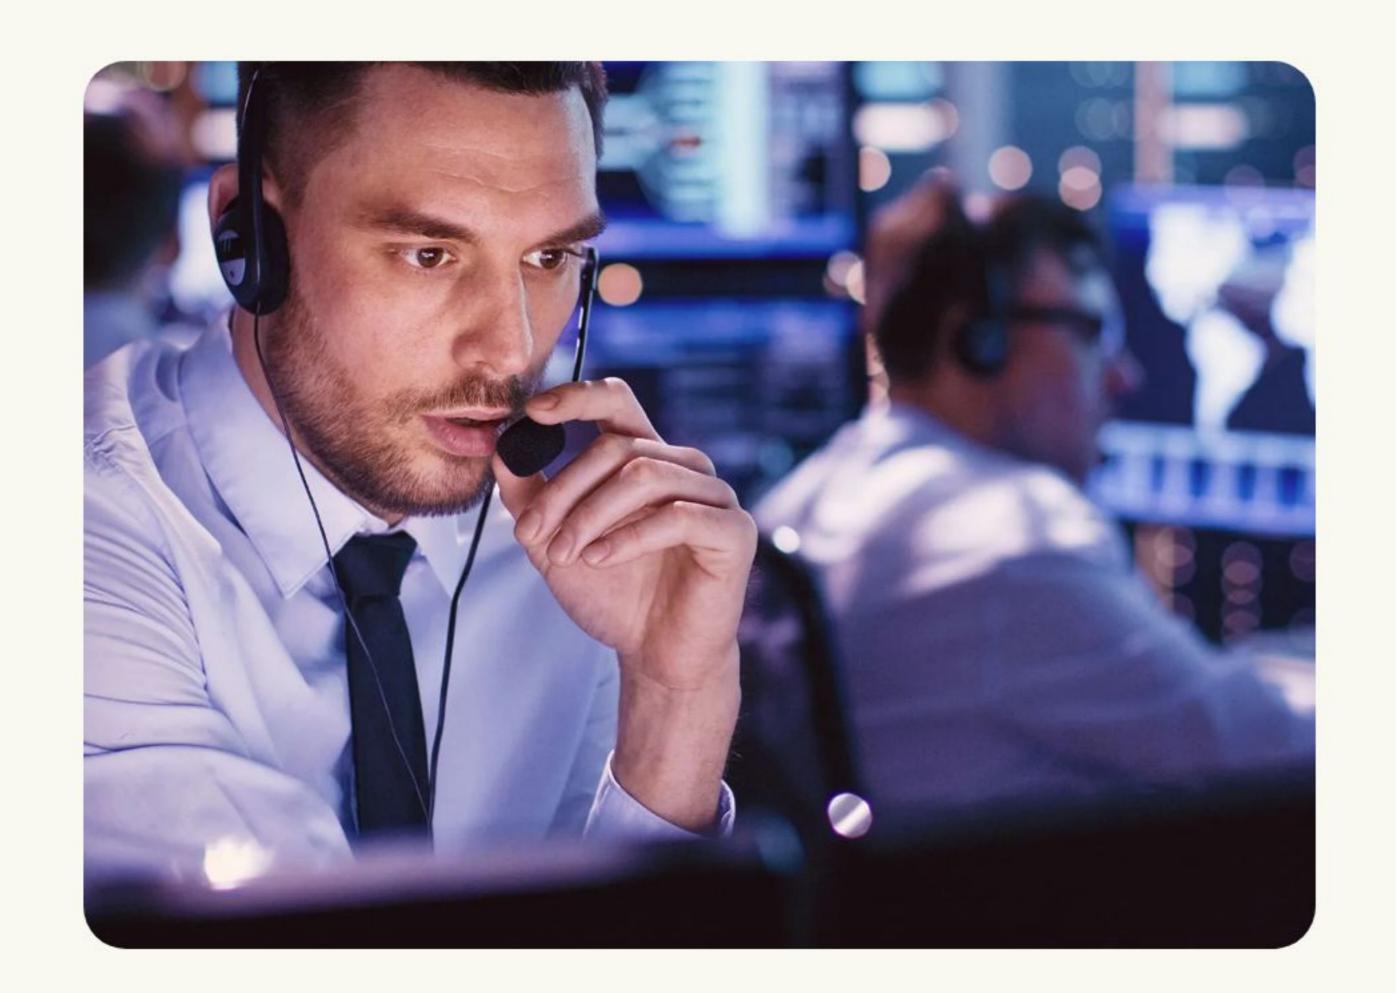

### Global Connectivity

Get connectivity everywhere, at all times using Iridium's satellite network – the only network to span the entire globe.

### Full app functionality

Satellite mode is compatible with all StaySafe features including panic alerts, welfare checks, fall detection, quick start and driving mode.

## Professional monitoring and response services

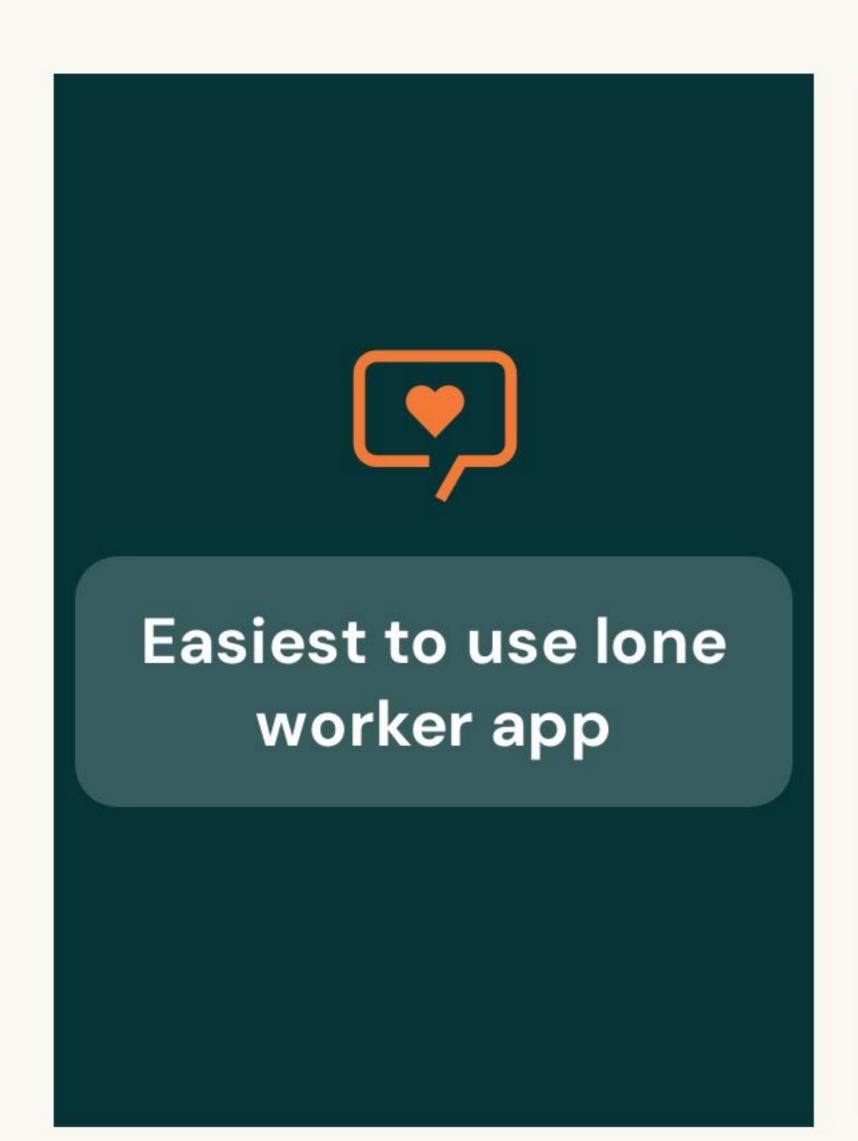

We work with a number of security accredited monitoring stations around the world to provide our clients with a professional and robust monitoring service for their lone workers.

Outsourced monitoring is a great solution for organizations with large workforces, out of hours operations or those who do not have the resource to monitor lone worker safety in-house.

Outsourcing the safety monitoring of your lone working employees gives you peace of mind that any alerts are dealt with by experienced and highly trained call handlers who will respond according to your pre-agreed procedures no matter when or where the alarms happen.

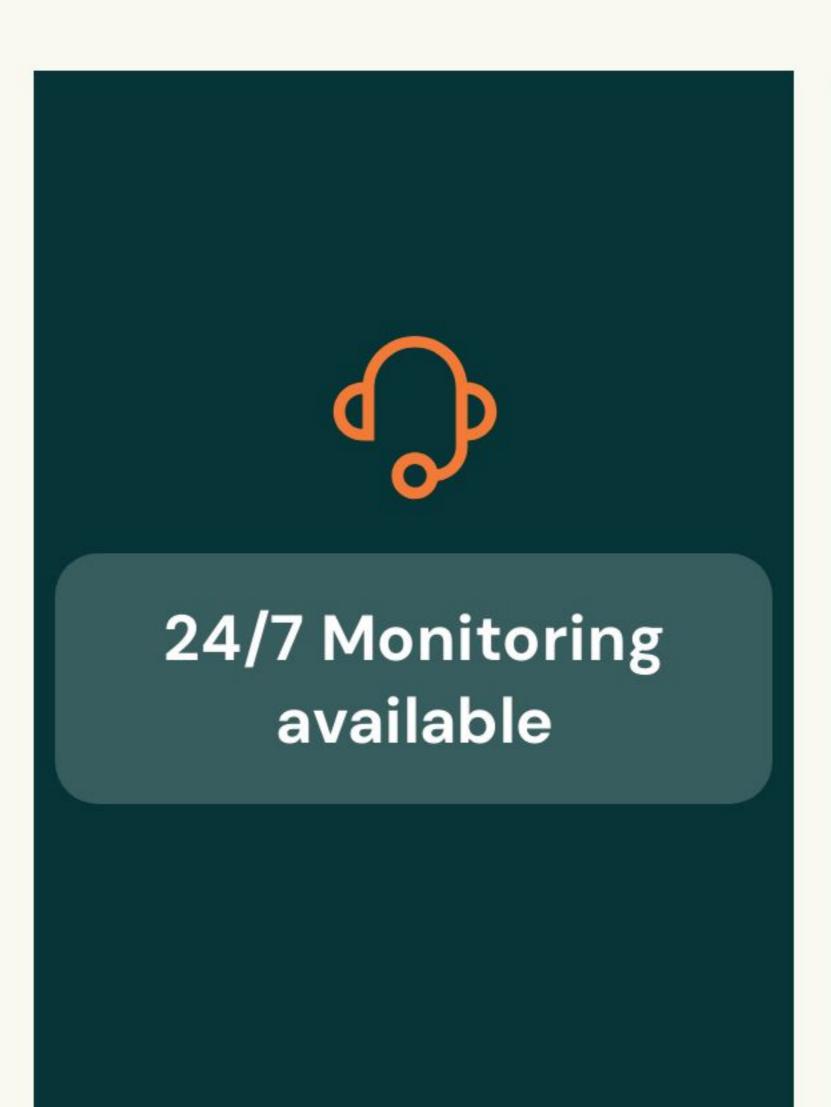

### Key benefits include:

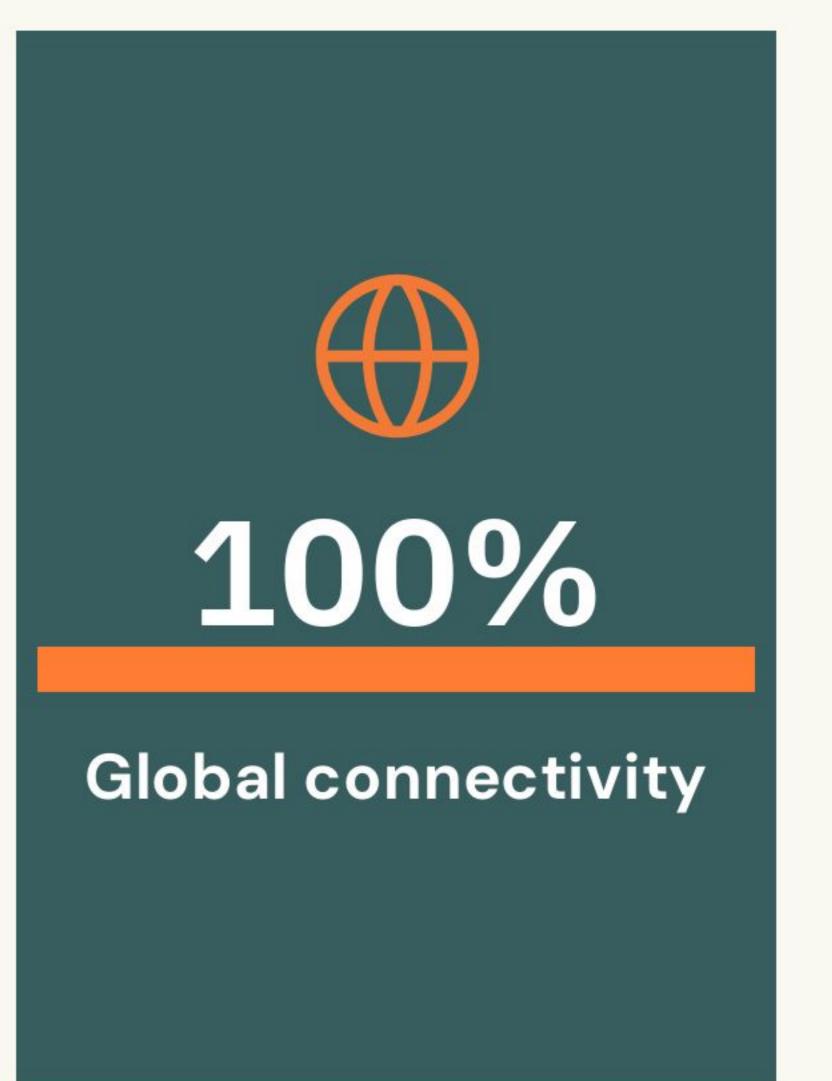

- Fully risk assessed response process
- Reliable 24/7 monitoring
- Alerts resolved by experienced and highly trained call handlers
- Reduced admin burden for your internal teams
- Opt for full time monitoring or out of hours
- Peace of mind that no-one will be missed

90,000+

employees kept safe globally, every day

"We chose StaySafe primarily for its ease-ofuse — it's very simple to use, and no one has any problems using it. We also really like the dashboard, how you can see everything and everybody in one place. Plus, it is very cost effective".
