

Risk AI Advisor

Your AI Sentinel That Spots Significant Risks in Real-Time

With information constantly flowing in from all corners of your enterprise, cutting through the noise and identifying hidden risks and trends in your data can be like finding a needle in a haystack. Meet Benchmark Gensuite's Risk AI Advisor, a game-changing AI & analytics solution that continuously monitors your data streams and identifies potentially significant risks and trends across operations.

How It Works

Risk AI operates as a sentinel in the background, analyzing and classifying every record within vast data sets and surfacing risks to leaders and key team members for review and remediation before they escalate into a serious event.

Risk AI Offers:

Rapid Advisory Insights

Pinpointing top risks with state-of-the-art AI technology, backed by the expertise of seasoned health and safety professionals with over 25 years of experience

Clear Reporting

And out-of-the-box Tableau & Power BI analytics to identify the "who, what, and where" behind risks, so you can focus attention and efforts where they're most needed

Personalized and Flexible Alerts

And mobile push notifications to keep leaders and key team members informed of emerging risks for fast investigation and response

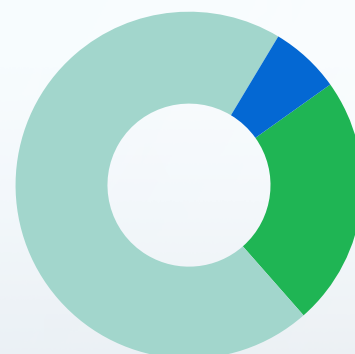

Case Study: Transforming Workplace Safety through AI-Driven Insights

A company with 36,000+ incident and safety concern reports leveraged Risk AI Advisor to unlock the power of their data. Within days, they discovered:

- **Risks with the potential to escalate into significant events in 5% of their data**
- **Incident precursors such as electrocution and fall hazards and fire/smoke risks in 15% of their data**

With Risk AI Advisor, the business was able to take action swiftly, translating insights into actionable steps for improved workplace safety and risk reduction.

Previously unimaginable, this level of responsiveness is now a reality with our ground-breaking, first-of-its-kind AI solution.

Typical Data Analysis Process

Let Benchmark Gensuite Risk AI Advisor do the work here...

... So you can focus your time here!

Traditional data analysis could take months to process and uncover actionable insights, but with the Risk AI Advisor, you can achieve this in a day!

See What Users Are Saying

“

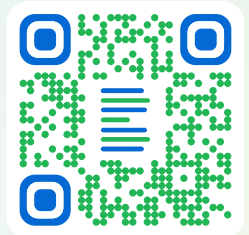

Risk AI Advisor allows us to unlock hidden information in the massive amounts of data generated in modern industrial operations, then analyze it to create a reliable prediction, in real time, of where risk is on our work floors. With this tool, we are finally able to get ahead of incidents and truly create a safe work environment in our facilities.”

CHET BRANDON

Senior Director of Global EHS Operations
Hexion, Inc.

“

Risk AI is the Holy Grail of risk management in EHS, and it is one of the most groundbreaking developments I have witnessed in my 35-year career as an EHS leader.”
