

KPA Flex

Make Environmental, Health,
and Safety easy and efficient
with KPA Flex.

KPA Flex allows organizations to establish and implement a comprehensive safety program, make data-driven decisions, and take real-time action to keep employees safe and compliant.

Why Flex?

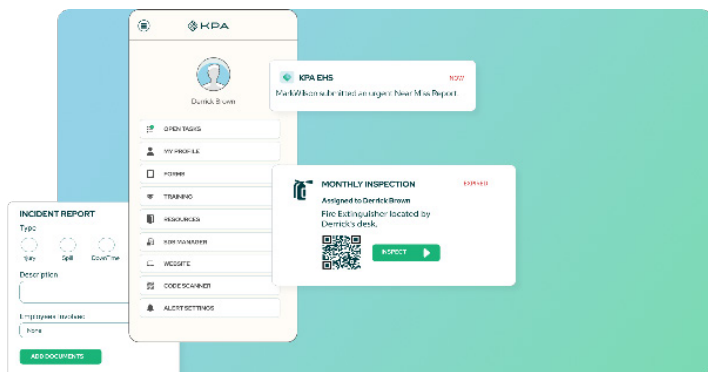

KPA Flex is a highly configurable software platform that provides EHS managers with flexible tools that can be tailored to the organization's specific business requirements. The result is a comprehensive EHS program to help keep workers safe and informed, while staying compliant with federal and state-specific regulations.

Mobile App

Access reports, training, and resources in the field. KPA provides a free native app for Apple and Android devices through the iTunes App Store and the Google Play store. These apps take advantage of functions like the GPS, camera, push notifications, and offline storage to streamline tasks for your team members in the field.

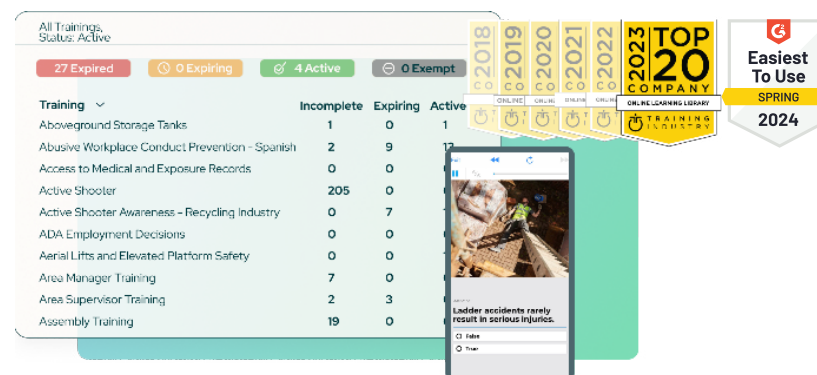

Mobile Forms	Configure forms to manage audits, inspections, incidents, risk assessments, and more.
Mobile Training	Complete online training and quizzes.
Resource Library	View PDFs and other documents like SOPs, handbooks, and policies.
My Profile	Access your profile, training, and other info offline.
Push Notifications	Get notified for critical reports or assigned tasks.
QR Code Scanner	Scan employee and equipment QR codes.
Open-Tasks List	Receive tasks for training, inspections, sign-offs, follow-ups, and more.

Training and Learning Management

Training is critical to the success of any EHS Program. With KPA Flex, you can access a feature-rich learning management system that gives you the tools to keep your team educated and informed.

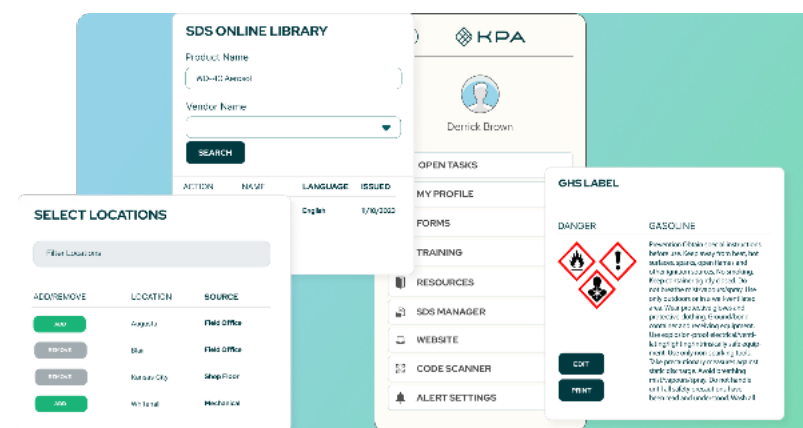

Assign Training	Assign training to your team and let the system monitor tasks and completion status.
Run Status Reports	See which team members have expiring or out-of-date training.
Pre-Built Course Library	Import and edit content from a pre-built library of lessons to fit your organization's policies and procedures.
Customize Online Training	Create your own training content using PowerPoint slides, videos, quizzes, and more.
Mobile Access	Complete training and take quizzes from your mobile device.

Scope 1-2-3 CO₂ Accounting	Measure your GHG emissions and carbon accounting footprint. Emissions tracking and forecasting, data collection, and reporting.
ESG Management and Reporting	Track and manage ESG KPIs and performance in one dashboard. Measure against GHG Protocol Corporate Standards, United Nations Sustainable Development Goals, GRI, and worldwide ESG legal and compliance standards.
Supply Chain Sustainability	Monitor supplier program, certification, and document compliance, and gain greater transparency across all your sustainability policies and initiatives.

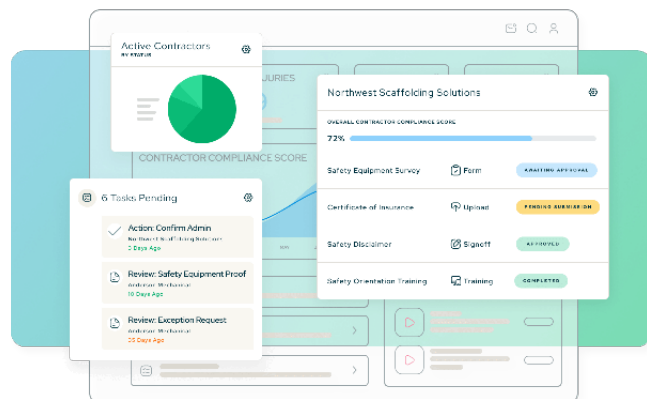

- ◆ Access a master library of over 70 million Safety Data Sheets.
- ◆ Create your own custom SDS library based on the chemicals present at your facilities.
- ◆ Quickly access any SDS with an easy to search interface.
- ◆ Offline access and hardcopies available.
- ◆ Pre-populated secondary container labels ensure GHS compliance.

Contractor Management

Managing contractors poses operational challenges and areas of risk that require a dedicated solution. Contractor management offers an easy-to-use platform that lets you streamline your contractor qualification and vetting process as well as manage, collect, and verify required information from contractors to ensure compliance.

Contractor Profile	Maintain detailed records and status updates for each contractor.
Configurable Prequalification	Customize requirements to meet your specific operational needs.
Contractor Portal	A streamlined platform for contractors to submit and manage their documentation.
Compliance Scoring and Risk Rating	Evaluate contractors systematically to maintain high compliance standards.
Visitor Management	Keep track of all contractor visits to ensure compliance and security.
Contractor Training	Offer specialized training tailored to job-specific risks and requirements.
Enhanced Reporting	Understand and see exactly who is compliant easily.

Reporting and Dashboards

Analyze your EHS data and take corrective and preventive actions. Configure dashboards to show performance measurements relevant to your business.

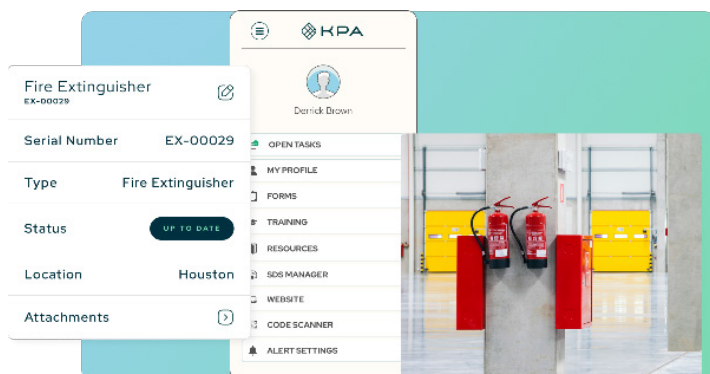

- ◆ Filter and analyze responses.
- ◆ View responses as charts, trends, or custom field.
- ◆ Export data to PDF or Excel.
- ◆ Assign follow-ups to employees and track progress to closure.
- ◆ Schedule automated report analysis daily, weekly, etc.
- ◆ Generate OSHA-required reports.
- ◆ Multi-form and project-based reporting.

Asset Management

KPA Flex lets you track and complete inspections for any type of equipment or asset. You determine how often inspections are due, who they are assigned to, and what form should be completed. The system will automatically track the status and assign tasks to keep things running smoothly.

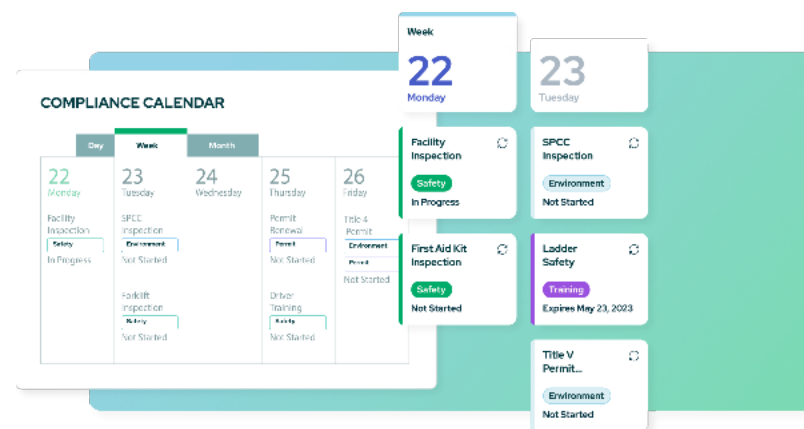

Schedule Inspections	Create an “equipment type” including what inspections need to be completed and how often.
Assign Inspections	Assign an equipment inspection to any employee. When the inspection status expires, the assignees will receive a task in their open-task list.
Inspection Status Reports	Run inspection status reports any time to see which assets have up-to-date, expiring, or expired inspections.
QR Codes	Each asset is assigned a QR code. Team members can simply scan a QR code and perform an inspection in seconds.

Compliance Calendar

Gaining visibility into all the activities and tasks within an EHS Program is critical to its success. With KPA Flex’s Compliance Calendar, you can access and organize all your compliance and training tasks—completed and pending—and take critical actions from within the calendar view.

- ◆ Manage recurring action item assignments.
- ◆ Send notifications to ensure tasks are completed on time.
- ◆ Attach permit forms, photos, and published report.
- ◆ Sort calendar by activity, location, regulation type, and more.
- ◆ Provide a library of deadlines, policies, and permits in a single location.
- ◆ Assign tasks by individual or group.
- ◆ Toggle ‘on’ tags—custom or color-coded for action items, non action items, and compliance deadlines.
- ◆ Leverage a universal search function.
- ◆ Organize subtasks according to main tasks.
- ◆ Rely on calendar for environmental permit tracking and audits.

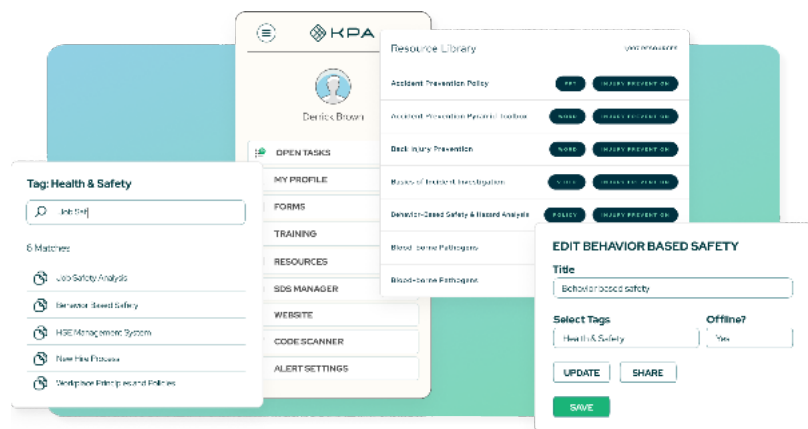

Resource Library

Make safety and compliance easy and efficient with the KPA Flex Resource Library.

Access over 180 pre-written policies, procedures, posters, and “Toolbox Talks” training content. The resource library covers complex OSHA regulatory topics such as emergency response, equipment safety, hazard communication, injury and illness prevention, and much more.

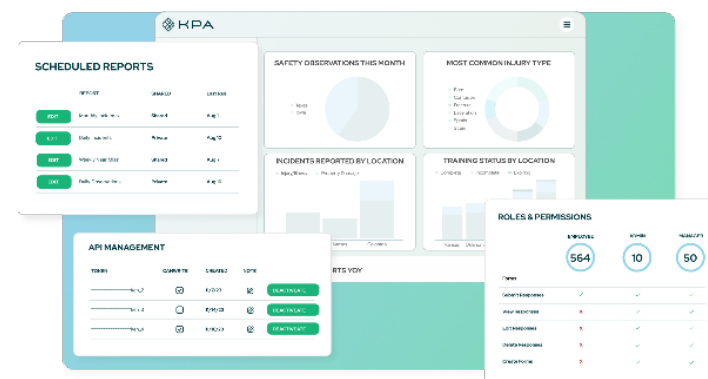

Customize the existing templates to meet your business requirements. You can also upload your own existing content as needed.

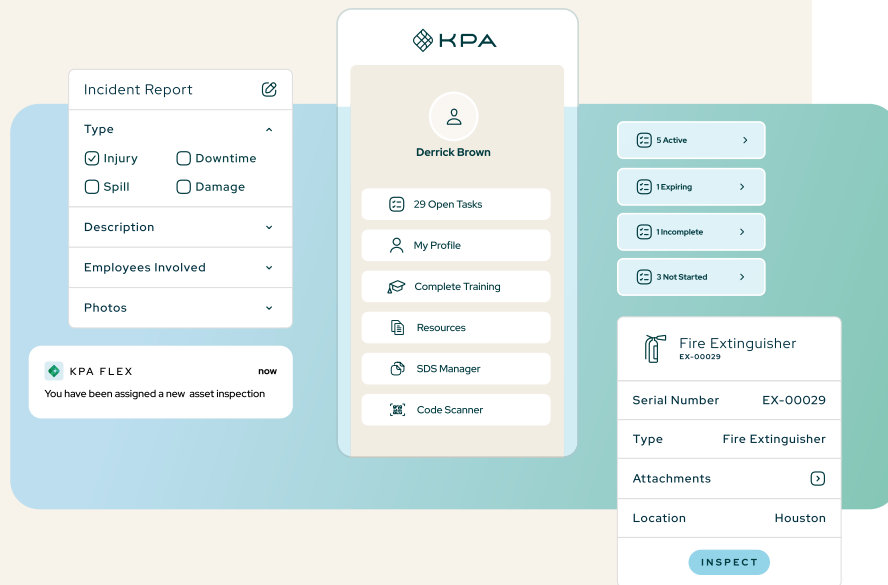

Control Panel

The KPA Flex Control Panel makes it easy to administer your KPA Flex account. With the Control Panel, quickly configure the system to fit your team and processes.

Employee Management	Create new profiles, generate QR code stickers, view open tasks, add custom fields, and more.
Roles & Permissions	Create new roles, delete existing roles, and re-configure permissions however you prefer.
Scheduled Reports	Setup daily, weekly, monthly, or annual reports for training status, inspection status, recent reports, pending follow-ups, and more.
Importing Data	Add employees, assets, trainings, and more into the system or upload a spreadsheet to batch import large amounts of data.
API	The API offers programmatic access to your data for your IT group. Dozens of data types are available including form responses, training completions, inspections, employee profiles, follow-ups, and more.
