DIGITAL TRANSFORMATION ROI

ANVL

YOUR OPERATION NOW

INEFFICIENT ADMINISTRATION

Industrial businesses **waste on average $45,000/month** per 100 frontline workers in combined wasted labor costs. Searching for, printing, scanning, emailing, manual data entry (Excel/SharePoint), and even driving documents to and from locations to ensure compliance.

- 17 minutes in administrative time/form
- 1,330 hours/month
- $40 average hourly rate of US frontline workers

$540,000/year in wasted labor costs

INCREASED RISK

Relying on institutional knowledge and standardized operating procedures in a binder, do nothing to protect the business from liability.

- OSHA Penalties = $15,625 per violation
- Lost time = $
- Worker's comp premiums = $$
- Lawsuits = $$$
- Employee turnover = $$$$

MISINFORMATION = MISGUIDED SOLUTIONS

Paper and digital forms are mostly pencil-whipped, after the fact, leaving management with incomplete, untrustworthy data and guessing at root causes, accountability, and solutions.

- Where is our next incident most likely to occur and why?
- What do our teams most need training on?
- Which supervisors are taking proper, immediate corrective actions?

YOUR OPERATION WITH ANVL

COST SAVINGS & PRODUCTION INCREASE

By leveraging Anvl's mobile application and real-time insights dashboard, companies eliminate unnecessary administrative time and cost while reducing downtime. Your entire workforce becomes more productive increasing revenue and improving customer timelines. Anvl clients see (actual results):

- $191,000 in labor cost savings
- 80 hours of increased production/month
- 219% increase in safety compliance

RISK MITIGATION

In the plant or in the field, Anvl works offline, ensuring nearly 100% compliance. Now, your team always has the right information, at the right time, and management is automatically notified of risks and potential issues before they become a problem.

- Capture photos and video in real-time
- Require eSignatures when and where needed
- All data is saved and easily searchable in insights for audits
- True accountability through corrective actions

PROACTIVE CONTINUOUS IMPROVEMENT

Without Anvl, management spends ~80% of their time searching for problems and 20% on misguided solutions; Anvl clients spend 80% of their time on solutions rooted in trustworthy data, accessible in real-time.

- Identify bad actors or bad processes
- Improve EMOD (reduce SIFs and RIR)
- Increase accountability throughout the organization
